TECHNICAL SKILLS

Languages: Ruby, Python, Java, SQL (Postgres, MySQL), JavaScript, HTML/CSS, PHP

Frameworks: Ruby on Rails, ReactJS, Node.js, Flask, Laravel

Developer Tools: Git, Docker, Nginx, VS Code

EXPERIENCE

Full Stack Developer

Apr 2022 – Nov 2025

Bell Canada

Mississauga, ON

- Led the development of software integrating an **Anritsu** network simulator, enabling automated signal testing to certify devices for market release
- Worked in Agile team to maintain and develop **Device Automation** framework in **Ruby on Rails**
- Developed over **60** test scripts for use in our automation platform that performs Android and web automation tasks to ensure timely certification of upcoming devices thereby saving **+2,000** manual work hours and **\$200,000 annually**
- Supported internal customers to assist with tool-related issues that impacted their automated app testing
- Led the development of a dockerized **AI micro-service in Flask** that utilized image detection and Tesseract OCR for optical character recognition in app automation tasks. Responsible for all backend **architecture** decisions
- Integrated AI micro-service with automation framework by creating an **API** to return coordinates for the framework to interact with.

PROJECTS

Badminton Stat Tracker | *Flutter, PostgreSQL*

- Created a mobile app with flutter and Postgres database to track badminton win/loss stats along with a match maker
- Built a robust backend to store matches, teams, and player statistics, ensuring fast data retrieval and reliable syncing across devices.

Portfolio Website | *JavaScript, NextJS, HTML/CSS*

- Built and deployed a responsive web portfolio to present software development projects and technical skills. Implemented with NextJS, TypeScript, and Tailwind CSS, emphasizing clean UI design and performance optimization.

EDUCATION

Durham College

Oshawa, ON

Ontario College Advanced Diploma Computer Programming and Analysis GPA:4.79 Sept 2019 – Apr 2022
